- **Job description**

At DNV the intern would be supported to lead an exciting research opportunity aimed at building the minimum viable product for an internal tool which could improve the quality of DNV Renewables Certification deliverables. The intern would use the Machine Learning discipline of Natural Language Processing to categorize text in order to provide further insight to our engineers. The intern would not need to be an expert in machine learning but should understand some basic concepts and have at least a moderate level of programming proficiency. More importantly the intern should be enthusiastic, open to learning new professional skills and enjoy creative problem solving.

- **Location of work**

Banqiao, New Taipei city.
