

- **Job description**

Cadeler's intern will get a comprehensive overview of our business as one of the world's largest offshore wind Transportation and Installation contractors. If state-of-the-art vessels and marine engineering are your thing, this is the position for you. The internship will rotate through 3 positions over 3 months:

- Shadow a Senior Project Manager working on a current wind turbine installation project in Taiwan
- Shadow a Senior Project Manager preparing for a wind turbine installation project in Taiwan in 2025
- Shadow a Senior Commercial Manager whose role involves winning future installation projects in APAC, building regional partnerships, and understanding offshore wind markets in countries like Korea, Japan, the Philippines, Australia, Vietnam and India.

Candidates should be comfortable working in a fast-paced, collaborative environment, with tight deadlines. A background in engineering will undoubtedly enhance the internship experience, but outstanding candidates with commercial or legal skills will also be considered.

- **Location of work**

Taipei, with occasional work travel to Taichung.
