

We are looking for a driven and innovative intern in Taiwan to join our internship program for 2024. This is your opportunity to gain valuable experience in a consultancy that will provide you with a platform to tap into expertise across the globe and give you the hands-on experience to make a difference in the communities that we live and work in. The programme will provide you with invaluable networking, learning and development opportunities.

You will be part of a multi-cultural and multi-disciplinary team and your job description includes:

- Contribute to a variety of renewable energy project services, such as feasibility studies, lenders' technical due diligence and owner's engineer services, across all-project lifecycle stages, including development, financing, design, construction, and operations.
- Support project managers to deliver high quality work that exceeds our client's expectations.
- Supporting business development activities.
- Collaborate with other team members (both locally and globally), across disciplines and sectors, to encourage innovation and open opportunities with connected thinking.

Candidate Specification :

- Pursuing a Bachelor's or Master's degree in engineering from a good university (ideally 3rd year/final year).
- Strong interest in the renewable energy industry and environmental trends/issues in Asia.
- Self-motivated, analytical with a learning mindset.
- Excellent interpersonal, communication & presentation skills.
- Excellent written communication with great attention to detail
- Team player with the ability to use your initiative to undertake tasks efficiently and independently.
- Good command of English and Mandarin.
