

Wood Thilsted is a specialised offshore wind engineering consultancy designing the transition to clean energy. Our unmatched experience in end-to-end offshore wind, from project exploration to operation and lifetime extension, is delivering some of the world's largest offshore wind farms more efficiently and at a lower cost.

The newly designed company webpage is here: <https://www.woodthilsted.com>

Areas of responsibility: As an Intern, your main assignments will be to assist in the management of offshore and onshore site surveys to ultimately provide high-quality data deliverables with due care to our clients in the offshore wind industry. For all site survey projects, you will work alongside a Lead Project Manager/Project Manager in order to assist with procurement, planning, preparation and management of both geophysical and geotechnical site surveys, playing a role in the safe and successful execution of these projects.

For all projects you will work closely with the Wood Thilsted Site Investigation Team and, to a lesser degree, the Client Project Team, engaging in the day-to-day discussions regarding project planning and decision making. In your role you will assist with:

- Undertake preparation for offshore survey operations including meetings with service providers, inspections and audits and documentation review
- Manage the day-to-day offshore operations and track progress and costs
- Liaise with the client to provide updates on project progress and budgets

There may also be an opportunity to work with the Cable T&I team to observe on site activities related to HDD operations and the chance to learn about some structural engineering, especially related to secondary steel.

The work location will be in our Taipei office. You may expect some travelling within Taiwan in relation to your work.

Your background: We are looking for someone who thrives in an international environment and is fluent in Mandarin Chinese and has a good level of English, both written and oral. An individual that has strong drive and takes initiative/responsibility for your assignments and is motivated by creating excellent results through teamwork. It is essential that you possess excellent communication and interpersonal skills with the ability to liaise with teammates, clients and other consultants effectively.
