

<b>Job title:</b>	Business intern
<b>Reporting to:</b>	Co-Founders
<b>Location:</b>	Remote working and Taipei
<b>Duration:</b>	2-3 days/week for 2-3 months
<b>About us</b>	
<p>KIMAenergy ("KIMA") is an independent advisory firm focusing on offshore wind and early-stage project development within the Asia-Pacific region. Our edge is our experience, local knowledge and network. Our two female founders have over 20 years collective experience in leadership roles in blue-chip developers on large scale offshore wind projects in Europe and Asia. They are amongst a few individuals in the world that have built teams and led the development of offshore wind projects in Asia.</p> <p>KIMA is a newly established UK business operating in Taiwan and Asia-Pacific. Our founders are looking for an intern to join us and support our advisory workstream in Asia-Pacific. As part of a small team, the intern will have direct access to the business owners, working closely with highly skilled leaders and having first-hand insight into the development phase of projects in Taiwan and across Asia-Pacific. This is a valuable role for those looking to move into project development in the renewables sector.</p>	
<b>Job description</b>	
<ul style="list-style-type: none"> <li>• Supporting the business founders with delivery of strategic advisory services to clients across Asia-Pacific, such as project origination, bid management and project delivery</li> <li>• Researching renewable energy trends and markets for development across Asia-Pacific</li> <li>• Identifying regulation and policy relevant to development, mapping stages of policy, interpretation and gap analysis compared to other markets</li> <li>• Establishing a database of policies across markets</li> <li>• Undertaking research with local stakeholders to identify future areas of policy change</li> <li>• Drafting proposals to clients to provide advisory services in support of delivering renewable energy projects</li> <li>• Drafting advice reports and presentations to clients across multiple business areas</li> <li>• Drafting articles on industry insights and thought leadership relating to renewable energy initiatives</li> <li>• Other specialist projects reflecting client and business needs</li> </ul>
